The Robert Scott Bell Show: Homeopathic Hits - Erechthites Hieracifolia

Erechthites hieracifolia: The Lung Bleed, Haemorrhage, Ediema and Poison Oak Remedy

Introduction:

Today's Homeopathic Hit is Erechthites hieracifolia, commonly known as Fire-weed. Boericke highlights this remedy as a haemorrhagic remedy, especially where there is bright red bleeding, epistaxis, lung haemorrhage, excitement of the circulation, flashes of heat and coldness, scanty urine, oedema of the extremities, and skin symptoms resembling Rhus poisoning.

Origin of Erechthites Hieracifolia:

Prepared from the Fire-weed plant, Erechthites hieracifolia reflects a remedy picture centered on bleeding tendencies, circulatory excitement, alternating heat and coldness, urinary scantiness, swelling of the extremities, and Rhus-like skin irritation.

Key Characteristics and Primary Uses

Haemorrhagic Remedy: Boericke identifies this as a remedy centered on haemorrhage.
Epistaxis of Bright Blood: Nosebleed with bright red blood is part of the remedy picture.
Haemorrhage from Any Part: Bleeding may occur from various parts of the body, especially the lungs.
Circulatory Excitement: Haemorrhage is attended by excitement of the circulation.
Flashes of Heat and Coldness: Alternating heat and chill sensations may accompany the state.
Scanty Urine: Urine may be diminished in quantity.
Oedema of the Extremities: Swelling of the extremities is included in Boericke's picture.
Rhus-like Skin Symptoms: Skin symptoms may resemble Rhus poisoning.

Dosages and Potencies

Boericke's Dose: Tincture.
Local Use: Boericke notes local use for Poison Oak. RSB recommends 2x or 3x potencies.
Medium Potencies: 6x, 6c, 12x, 12c, 15x, 30x, 30c.
Higher Potencies: Consult your favorite homeopath through **GNHShealing.com** or **VibrantLife247.com**.

Complementary Remedies

Based on bright blood haemorrhage, epistaxis, lung bleeding, circulatory excitement, heat and cold flashes, oedema, scanty urine, and Rhus-like skin symptoms

Erigeron: Boericke comparison for haemorrhage, especially bright bleeding tendencies.

Millefolium: Compare in bright red bleeding and haemorrhagic states.

Hamamelis: Compare where haemorrhage, venous weakness, and soreness are prominent.

Rhus toxicodendron: Compare where the skin symptoms resemble Rhus poisoning.

Phosphorus: Symptom-based comparison for bright bleeding and lung haemorrhage tendencies.

Apis mellifica: Compare when oedema and swelling of the extremities are prominent.

Cantharis: Compare where burning urinary irritation and scanty urine enter the picture.

Cuprum: Blood and vascular support.

Lachesis: Blood and bleeding abnormalities indicated.

Cautions:

Haemorrhage, epistaxis, suspected lung bleeding, persistent oedema, or scanty urine should be evaluated by a qualified health professional. This remedy discussion is educational and should not be used to delay diagnosis or treatment.

Conclusion:

When bright bleeding appears with circulatory excitement, when epistaxis or lung haemorrhage enters the picture, when flashes of heat and coldness accompany scanty urine and oedema, and when the skin resembles Rhus poisoning, Erechthites hieracifolia reflects Boericke's focused remedy state - a Fire-weed remedy centered on haemorrhage, circulation, urinary scantiness, swelling, and poison oak-like skin irritation.
