The Robert Scott Bell Show: Homeopathic Hits - Eucalyptus Globulus

Eucalyptus globulus: The Mucus/Congestion, Antiseptic and Toxemia/Fever Remedy

Introduction:

Today's Homeopathic Hit is Eucalyptus Globulus, commonly known as Blue Gum-tree. Boericke presents it as a powerful antiseptic, a stimulating expectorant, and an efficient diaphoretic, with marked action on catarrhal processes, malaria, influenza, intestinal disturbance, fevers, mucous surfaces, haemorrhages, exhaustion, and toxaemia.

Origin of Eucalyptus globulus:

Prepared from the Blue Gum-tree, Eucalyptus Globulus reflects a broad remedy picture centered on the mucous surfaces of the air passages, genito-urinary organs, and gastro-intestinal tract. The picture includes foul discharges, respiratory mucus, digestive catarrh, urinary irritation, fever states, and prostration after toxic or infectious illness.

Key Characteristics and Primary Uses

Antiseptic and Catarrhal States: A remedy with marked effects on catarrhal processes and mucous surfaces.
Influenza, Malaria and Fevers: Influenza, malaria, typhoid states, continued fevers, and fevers of a relapsing character.
Respiratory Catarrh: Coryza, sore throat, chronic purulent nasal discharge, sinus involvement, bronchitis, bronchorrhoea, asthma, and offensive muco-pus expectoration.
Digestive Catarrh and Dyspepsia: Atonic dyspepsia, slow digestion, fetid gas, gastric and intestinal catarrh, and upper abdominal pain several hours after eating.
Diarrhoea and Dysentery: Acute diarrhoea, typhoid diarrhoea, dysentery with rectal heat, tenesmus, haemorrhage, and thin watery stools.
Urinary Inflammation: Acute nephritis complicating influenza, haematuria, pus in urine, catarrh of the bladder, burning, tenesmus, diuresis, and gonorrhoeal irritation.
Haemorrhagic Tendency: Boericke notes haemorrhages internally and locally, including vomiting of blood in severe gastric states.
Rheumatic, Skin and Glandular Symptoms: Rheumatic pains, nodular joint swellings, glandular enlargements, foul indolent ulcers, and herpetic eruptions.
Exhaustion and Toxaemia: Symptoms of exhaustion, toxaemia, foul discharges, high temperature, and accelerated but not strong pulse.

Dosages and Potencies

Boericke's Dose: Tincture in one to 20 drop doses, and lower potencies. Boericke also notes Oil of Eucalyptus in five-drop doses. Can be used effectively at 2x and 3x as well.

Medium Potencies: 6x, 6c, 12x, 12c, 15x, 30x, 30c.

Higher Potencies: Consult your favorite homeopath through GNHShealing.com or VibrantLife247.com.

Complementary Remedies

Based on catarrhal processes, respiratory mucus, foul discharges, gastro-intestinal irritation, urinary catarrh, haemorrhage, fevers, exhaustion, and Boericke comparisons

Hamamelis: Compare where haemorrhage is prominent, internally or locally.

Hydrastis: Compare in thick catarrhal secretions, mucous membrane weakness, and gastric catarrh.

Kali sulphuricum: Compare in catarrhal respiratory states with mucus and shifting inflammatory conditions.

Kali bi: Additional support for sinus congestion.

Balsamum peruvianum: Compare in bronchorrhoea and profuse expectoration.

Terebinthina: Compare in kidney involvement, urinary irritation, haematuria, and toxic states.

Anacardium orientale: Boericke lists Anacardium among comparisons, especially where gastric disturbance is part of the picture.

Arsenicum album: Compare in burning, weakness, foul discharges, diarrhoea, and exhaustion.

Rhus toxicodendron: Compare in rheumatic pains, skin eruptions, and febrile restlessness.

Chelidonium majus: Symptom-based comparison for digestive and hepatic involvement.

Cinchona: Malaria, fevers.

Cautions:

Influenza complications, nephritis, haematuria, pus in urine, asthma with great dyspnoea, haemorrhage, typhoid states, persistent fever, foul ulcers, or suspected malignant disease require evaluation by a qualified health professional. Essential oils should not be used internally unless directed by a qualified practitioner.

Conclusion:

When catarrh settles into the air passages, stomach, bowels, bladder, or kidneys, when discharges become foul, when fever and exhaustion enter the picture, and when respiratory mucus, dysentery, urinary burning, or haemorrhagic tendencies appear, Eucalyptus globulus reflects Boericke's broad Blue Gum-tree remedy state - antiseptic, expectorant, diaphoretic, and deeply connected to mucous surfaces under toxic strain.
