The Robert Scott Bell Show: Homeopathic Hits - Fuchsinum

Fuchsinum: The Red Discoloration,
Burning Mouth and Kidney Remedy

Introduction:

Today's Homeopathic Hit is Fuchsinum, also known as Fuchsina or Magenta. Boericke describes this remedy picture around deep red discoloration of the mouth and urine, swollen gums with burning and salivation, albuminous urine, profuse light red diarrhea with abdominal pain, and cortical nephritis with albuminuria.

Origin of Fuchsinum:

Fuchsinum is prepared from a coloring substance historically used in the adulteration of wine. Its remedy picture centers on redness, burning, mucous membrane irritation, urinary discoloration, albuminuria, diarrheal disturbance, and degenerative kidney involvement.

Key Characteristics and Primary Uses

Redness of the Ears: Boericke notes redness of the ears as part of the remedy picture.

Deep Red Mouth Discoloration: The mouth may show a deep red discoloration with swollen gums.

Burning Gums with Salivation: Swollen gums may be accompanied by burning and a tendency to salivation.

Deep Red Urine: The urine may appear deep red and albuminous.

Profuse Light Red Diarrhea: Diarrhea may be profuse, light red, and associated with abdominal pains.

Kidney Involvement: Boericke notes degeneration of the cortical substance of the kidneys.

Cortical Nephritis with Albuminuria: Useful in the remedy picture of cortical nephritis with albuminuria, without replacing proper medical care.

Dosages and Potencies

Boericke's Dose: 6x to 30th potency.

Low to Medium Potencies: 6x, 6c, 12x, 12c, 15x, 30x, 30c.

Higher Potencies: Consult your favorite homeopath through GNHShealing.com or VibrantLife247.com.

Complementary Remedies

Based on deep red discoloration of the mouth and urine, burning gums, salivation, albuminuria, cortical nephritis, red profuse diarrhea, and abdominal pains

Cantharis: Compare when burning urinary symptoms, kidney irritation, and inflammatory urinary tract symptoms are prominent.

Berberis: Kidney and urinary tract indications.

Solidago: Additional kidney support.

Terebinthina: Compare in kidney inflammation, albuminuria, dark or discolored urine, and urinary irritation.

Apis mellifica: Compare in nephritic states with albuminuria and inflammatory swelling tendencies.

Mercurius corrosivus: Compare where swollen gums, salivation, burning mouth symptoms, diarrhea, and mucous membrane irritation are marked.

Arsenicum album: Compare when burning sensations, weakness, digestive disturbance, and deep constitutional disturbance appear together.

Phosphorus: Compare in kidney involvement, hemorrhagic tendencies, burning symptoms, and weakness.

Rhus toxicodendron: Compare where redness, burning, and inflammatory skin or mucous membrane symptoms are part of the total picture.

Cautions:

Albuminuria, red or discolored urine, suspected nephritis, swollen gums, persistent burning of the mouth, or profuse diarrhea should be evaluated by a qualified health professional. This remedy discussion is educational and should not be used to delay diagnosis or treatment.

Conclusion:

When the picture centers on deep redness, burning mouth and gums, salivation, red urine, albuminuria, profuse red diarrhea, abdominal pains, and cortical kidney disturbance, Fuchsinum reflects a distinctive remedy state - one marked by discoloration, burning, mucous membrane irritation, and renal involvement.
