The Robert Scott Bell Show: Homeopathic Hits - Hydrangea arborescens

Hydrangea arborescens: The Gravel, Renal Colic, Bloody Urine and Bladder Irritation Remedy

Introduction:
Today's Homeopathic Hit is Hydrangea arborescens, commonly known as Seven-barks. Boericke highlights this remedy for gravel, renal calculus, renal colic, bloody urine, profuse white amorphous salts in the urine, vesical tenesmus, burning after urination, and bladder irritation with mucus and urinary deposits.

Origin of Hydrangea arborescens:
Prepared from the Seven-barks plant, Hydrangea arborescens reflects a remedy picture centered on the kidneys, ureters, bladder, prostate, and urinary deposits. Boericke especially emphasizes its action on gravel, calculi, uric and amorphous deposits, and painful urinary difficulty.

Key Characteristics and Primary Uses

Gravel and Calculus: A remedy picture marked by gravelly deposits, renal calculi, and urinary sediment.
Renal Colic: Sharp kidney and ureteral pain may be present, especially with calculus symptoms.
White Amorphous Salts: Profuse deposits of white amorphous salts in the urine are strongly noted.
Bloody Urine: Boericke includes bloody urine in the remedy picture.
Burning in Urethra: Burning may occur during urination, with frequent desire to pass urine.
Tenesmus After Urination: Bladder urging and straining may continue after passing urine.
Hard to Start Urine: The urinary flow may be difficult to begin.
Mucus Deposit: A heavy deposit of mucus may appear in the urine.
Pain in Loins: Sharp pain in the loins, especially on the left side, is characteristic.
Enlarged Prostate Symptoms: Great thirst, abdominal symptoms, and enlarged prostate are included in the sphere of this remedy.
Spasmodic Stricture: Boericke includes spasmodic stricture among the urinary indications.
Chest and Head Symptoms: Dizziness and oppression of the chest may accompany the urinary picture.

Dosages and Potencies

Boericke's Dose: Tincture.
Low and Medium Potencies: 3x, 3c, 6x, 6c, 12x, 12c, 15x, 30x, 30c.
Higher Potencies: Consult your favorite homeopath through GNHShealing.com or VibrantLife247.com.

Complementary Remedies

Based on gravel, renal colic, ureteral pain, bladder catarrh, urinary mucus, enlarged prostate, and profuse urinary deposits

Lycopodium clavatum: Compare in gravel, uric acid tendency, right-sided urinary and digestive disturbance.

Chimaphila umbellata: Compare in urinary difficulty, vesical irritation, and prostate-related urinary symptoms.

Berberis vulgaris: Compare for renal colic, pains radiating from the kidney region, and urinary sediment.

Pareira brava: Compare in painful urinary straining, difficult urination, and bladder tenesmus.

Uva ursi: Compare in bladder catarrh, mucus, burning, and chronic urinary irritation.

Sabal serrulata: Compare where enlarged prostate and urinary weakness are prominent.

Oxydendron arboreum: Compare in dropsical and urinary conditions with kidney involvement.

Geum rivale: Compare for bladder affections with pains extending to the end of the urethra.

Polytrichum juniperinum: Compare in enlarged prostate and prostatitis when urinary obstruction is prominent.

Taraxacum: Additional support for liver and kidneys.

Cautions:

Bloody urine, renal colic, suspected kidney stones, urinary obstruction, fever with urinary symptoms, or prostate enlargement should be evaluated by a qualified health professional. Severe pain, inability to urinate, or visible blood in the urine requires prompt medical attention.

Conclusion:

When gravelly deposits, white amorphous salts, renal colic, bloody urine, burning in the urethra, and post-urination tenesmus define the case, Hydrangea arborescens reflects Boericke's focused remedy state - a Seven-barks remedy centered on the kidneys, ureters, bladder, prostate, and urinary sediment.
