The Robert Scott Bell Show: Homeopathic Hits - Mitchella repens

Mitchella repens: The Bladder/Urinary Irritation, Uterine Congestion and Hemorrhage Remedy

Introduction:
Today's Homeopathic Hit is Mitchella repens, commonly known as Partridge-berry. Boericke presents this remedy where bladder symptoms accompany uterine complaints, especially uterine congestion, dysmenorrhoea, uterine hemorrhage, and irritation at the neck of the bladder with urging to urinate.

Origin of Mitchella repens:
Prepared from the Partridge-berry plant, Mitchella repens reflects a remedy picture centered on the relationship between the bladder and female pelvic organs. Its field includes bladder irritation, dysuria, catarrh of the bladder, dark red swelling of the cervix, painful menstruation, and bright red uterine bleeding.

Key Characteristics and Primary Uses

Bladder Symptoms with Uterine Complaints: Bladder irritation may accompany complaints involving uterine congestion.
Irritation at Neck of Bladder: There may be irritation at the neck of the bladder with frequent urging to urinate.
Dysuria: Painful or difficult urination is included in the remedy picture.
Catarrh of Bladder: Boericke includes catarrhal bladder irritation as part of this remedy state.
Uterine Congestion: The cervix may appear dark red and swollen.
Dysmenorrhoea: Painful menstruation is one of the female symptoms associated with Mitchella repens.
Uterine Haemorrhage: Bright red uterine bleeding is specifically noted in the remedy picture.

Dosages and Potencies

Boericke's Dose: Tincture.
Low to Medium Potencies: 2x, 3x, 6x, 6c, 10x, 12x, 12c, 15x, 30x, 30c.
Higher Potencies: Consult your favorite homeopath through GNHShealing.com or VibrantLife247.com.

Complementary Remedies

Based on bladder irritation, dysuria, catarrh of the bladder, uterine congestion, dysmenorrhoea, and bright red uterine bleeding

Chimaphila: Boericke lists this comparison where bladder catarrh and urinary irritation are prominent.

Senecio: Compare in pelvic and uterine complaints with urinary involvement.

Uva ursi: Compare in catarrh of the bladder and urinary irritation.

Geranium maculatum: Compare where bright red uterine bleeding and haemorrhagic tendencies are central.

Gossypium: Compare in uterine conditions involving menstrual disturbance and pelvic congestion.

Eupatorium purpureum: Compare where irritation at the neck of the bladder and urging to urinate are marked.

Phosphorus: Indicated when hemorrhage/bleeding issues are present.

Apis mellifica: Compare where bladder irritation, urging, and pelvic congestion overlap.

Cantharis: Compare in intense dysuria, bladder burning, and urgent urinary symptoms.

Cautions:

Painful urination, persistent bladder irritation, bright red uterine bleeding, abnormal cervical findings, or heavy menstrual bleeding should be evaluated by a qualified health professional. This remedy discussion is educational and should not be used to delay diagnosis or treatment.

Conclusion:

When bladder irritation travels alongside uterine congestion, when there is urging to urinate with dysuria or bladder catarrh, and when the female picture includes a dark red swollen cervix, painful menses, or bright red bleeding, Mitchella repens reflects Boericke's focused remedy state - a Partridge-berry remedy centered on the bladder, cervix, and uterine circulation.
